Description and Remarks

WHITE SANDS,NEW MEXICO:(At the proving ground,Viking 7 Rocket (48ft.long, weighing 5½ tons) was launched with motion picture camera in its side --it reached top speed of 4100 MPH and rose 135 Miles--hence,it is necessary to lean to side to get proper perspective from these pictures since they were taken from the SIDE of the rocket--portion of earth shown in this film has distorted curvature caused by special type lens used for testing purposes--spinning is caused by rotation of the rocket--in a complete rotation of the rocket,24 states are shown on the horizon----------
